a two-story, thirteen-room house for J. B. Luntham, furnishings for which arrived from Modena, few days since. This fine building will do much toward bringing people to this camp, as travelers are now sure of good ac-

ORE IN CLEOPATRA.

Each day's work in the Alaska produces good results. Drifts are being run east and west of the station on the 400 level, the east one having en-countered what is regarded by Mr. J. R. Case as entirely new ore chute, per values, with material improvement,

Talbot left for Salt Lake last even-

SILVER SHIELD'S NEW LEVEL. Drift Started in Ore on Second Level Below Tunnel.

With the work of cutting a station and opening the vein on the second level below the tunnel at the Silver Shield completed, Superintendent Hood came in from Bingham last night to absorb for a day or two some of the balmy air of springtime. Before leaving yesterday, Mr. Hood saw the first set of timbers leading into the ledge from the new station put in place, found there was more than a foot of fine ore where the drift had been started, and left the works with the satisfaction of knowing that the mine and opening the vein on the second started, and left the works with the satisfaction of knowing that the mine satisfaction of knowing the satisfaction of knowing that the mine satisfaction of knowing the satisfaction of knowing the

be.

The double-compartment shaft has now reached a deoth of 120 feet below the tunnel level and in addition to the large stoping area still untouched, above sixty feet in depth of virgin ground is now ready for the work of extraction to be taken up.

Superintendent Hood has made a fine record in developing the Silver Shield and now that the purchasing company in which he holds a considerable block of stock himself, is in final and absolute possession of the mine,

erable block of stock himself, is in final and absolute possession of the mine, without having a dollar's indebtedness hanging over it, he contemplates surrendering the superintendency and taking a long-contemplated trip east. It may be a month or two before he leaves, but he feels that he has earned a rest and now that he has accomplished what he set out to do one year ago, he proposes to take it.

GOLDEN EAGLE SHUTS DOWN.

Mine to Be Put In Charge of a Watchman.

After four years of active work, dur ing which time a vast amount of de velopment work has been done and something like 4,000 tons of good milling ore has been piled on the dump, the new directors of the Golden Eagle company yesterday decided to close the mine down and cut off the usual \$600 mine down and cut off the usual \$600 a month expense, pending the mapping out of a plan of action for the future. Yesterday morning the board held a meeting, at which the resignation of Superintendent C. H. Wilbur was tendered, but not acted upon, as he was desired to attend to the closing down and place a watchman in charge.

It is well known that for several months past the company has held an option on milling plants some twelve

months past the company has held an option on milling plants some twelve miles from the mine, at Humbolt, and combined, it is believed they would handle the mine's ores to perfection. These plants can be secured and placed in condition for work for less than \$10,000, and as a new mill would entail an outlay of more than double that amount, it is considered more than likely that ways and means wi be devised within a very short time to take up the option which the company

ores already mined, it is be The ores already mined, it is be-lieved, will show a value of from \$15 to \$15 on a mill run and as they are of a character that will work splen-didly under a combination of the amalgamation and evanide processes, the expense of purchasing the plants under consideration should be easily

The directors were again in session last night, but no plan of proceedure was reached.

CHICAGO MAN'S SCHEME.

Revolutionize Smelting-Can Treat Ores For \$1 Per Ton.

George S. Engle, a Chicago man, has entered the field with a gigantic scheme intended to revolutionize the smelting business. He has lately succeeded in organizing a stock company in Washington, D. C., capitalized for

He claims to have discovered a vaporizing and condensing process, the secret of which is to produce a heat of 3,000 degrees at a small cost and so

handled that its intensity will not destroy the furnaces. Mr. Engle claims he can do this by séparating the oxygen and nitrogen mechanically, then utilizing the non-combustible nitrogen as a jacket inside the walls of the furnace to protect them from destruction by the heat. He obtains the carbon for the combustion from petroleum oil, and the gas is mixed with the oxygen as it is introduced into the center of the furnaces.

In a recent interview about his new process, Mr. Engle said:

"Scientists have been able to separate the nitrogen from the oxygen in the air by chemical or electrical means, but never before has a process been perfected for separating them by purely mechanical construction. The other processes of securing and handling the free oxygen are far too costly to make them practicable for treating ores. It would cost some \$50 a ton to vaporize ores if the separation of the oxygen was accomplished by chemical means. Under our system the ores can be vaporized and recondensed at a cost of from 75 cents to \$1 per ton, whereas now it costs \$7 or \$8 a ton to smelt refractory ores.

"For \$10,000 we will be able to erect."

The diameter oxygen attention was accoled to the article yesterday, soon after his called to the article yesterday, soon after his return from Alta, and he deciared that nothing could be after his return from Alta, and he deciared that nothing could be after his return from Alta, and he deciared that nothing could be after his return. The mande is return. The more that nothing could be after her his return. The called to the article yesterday, soon after his return from Alta, and he deciared that nothing could

from 75 cents to \$1 per ton, whereas now it costs \$7 or \$8 a ton to smelt refractory ores.

Stateline, March 14.—The stamps at the Popkees mill, owned by the Johnny company, will begin dropping upon ore from the Johnny mine tomorrow. The management has been busy for the sold, but will only be placed in a mine in which an interest is granted to the company. We have secured one thing the modustry of that state, together with the old statistics showing the metal output. Mr. Czizek places the total output since with the old statistics on a copession of the condition of the mining the statistics on accessful run.

The Johnny is a wonderful mine, the values

As foretold in The Herald some days ago the directors of the Sunbeam Mining company met yesterday afternoon and levied an assessment of 10 cents a share, which is made payable on or before April 17, the date of delinquent sale being fixed for May 4.

At the same meeting the directors gave orders for the closing down of the wine for the present

Small Seams Have Been Encountered on 387 Leve!.

Silver City, March 15.—The Cleopatra again shows signs of yielding up treasures, and Captain Bard is correspondingly jubilant. Night before last, and again yesterday, both shifts encountered small seams of crystallized lead or and iron carbonates, dritting in the vein at the 387 level. Captain Bard says this find is too inconsequential to make any fuss about, other than that it demonstrates the presence of good mineral, and justifies more prospecting on the level before sinking.

Very little if any news is obtainable nowadays from this end concerning the Tesora, though a lot of development work is going on continuously. The company has cut and lifted something like five carloads of ore, some of it uses. The ore house and shaft house are filled with ore, and it is piled up all about the premises. Just why the management does not market the product seems as much a mysterry to Superintendent Creighton as to the wondering public.

Bach day's work in the Alaska pro-

share.

If as Mr. Barnett states, the mine will not resume operations until it can start out with a clean sheet, that means, of course, the second assessment soon, so the stockholders may expect to put up at least two more "Irish dividends" before the properly is put on a paying basis.

paying basis.

The ore shipments from the upper

The ore shipments from the upper levels have hardly came up to expectations and during the last month a deficit of \$2,600 was recorded.

Depth is needed to open up the richer ore bodies and while sinking was in order the stock held up to pretty respectable figures. When work in the spectable figures. When work in the shaft was stopped a decline followed until yesterday it reached the lowest upont in many months.

Lieuwan the well know stock broker, returned yesterday from a busingpoint in many months. until yesterday it reached the lowest point in many months.

METAL QUOTATIONS.

don market gave an intimation of the advance just recorded, as follows: "The silver market continues firm and Copper still holds up to 15½ on the local market and the predictions of the Lewisohns that the great foreign lemand would hold the price up for some time to come is most likely to

JUDGE M'CONNELL'S RETURN. The Big Colorado Asphaltum Deal

Still Hanging Fire.

Judge J. T. McConnell came in from Vernal yesterday, and registered at Vernal yesterday, and registered at the Knutsford. The judge said that he had been taking a hand in the bid-ding for grazing lands on the reserva-tion, and that he was successful in get-ting a foothold with the other success-ful bidders was evidenced by the fact that he was then engaged in securing the services of a "rough rider" to look after his four-footed possessions in that country

on Monday he expects to start for the Raven company's asphaltum mines and devote some time to looking after affairs there.

affairs there.
Regarding the Colorado deposits in which he, with Bert Seaboldt and others is interested, and upon which a big deal has been pending for several months, the judge said there was absolutely nothing to report at this time, though he hoped to be able to have something in the very near future.

MINES OF ALTA

Ore Shipment.

Tony Jacobson has returned from one of his periodical trips to Alta, where he has some extensive mining interests. The camp is getting lively again, he says, although considerable work has been going on through the winter. There has been very little snow in the Cottonwood canyons this year, much less that usual, and all winter long some of the largest producers have been sending down ore for treatment at the smelters. The snow is quite deep in the mountains around the camp of Alta, so Mr. Jacobson thinks there is not danger of a scarcity of water next summer.

The Albion mine is sending down a large shipment of ore and the owners of the Grizzly are getting ready to start up again.

If the good weather continues the tramway will start operating in a short time.

STORY WAS A FAKE.

West Argent Company Not Prepared to Build a Mill.

A reporter on the suburban daily published a story the other morning about the building of a 100-ton concentrating plant at the West Argent mine of Stockton, in which it was stated that a contract had been let for the machinery to cost as much as \$17,500, and that the company's mechanical enginer had given his word that the plant.

Silver, 60 cents per onnee. Copper, 15½c per pound. Lead, A. S. & R. Co.'s price, \$4.57½; New York exchange, \$4.67½@\$4.72½; New York brokers', \$4.45.

Mining Notes.

The Swansea marketed four cars of ore yesterday.

H. E. Carey has gone to Denver on min-ing business.

Harry S. Joseph is expected home from

the east today.

The Horn Silver mine marketed four cars of ore yesterday.

The Conklin sampler received four cars of ore from Tinite yesterday.

The Standish & Jimson company marketed a car of concentrates yesterday.

Sam Gilson has gone to Dugway to resume operations on the Buckhorn mine.

C. B. Markland of the Conklin sampling works is confined to his home with sickness.

J. Eiseman, the well known De Lamar merchant and mining man, came in from the south yesterday, and registered at the Cullen. The Taylor & Brunton sampler reported the arrival yesterday of four cars of ore from Tintic, four from Frisco and one from Bingham.

The directors of the Dexter company held an executive session of the board yesterday afternoon, but just what was done could not be learned.

days.

days.

Colonel J. H. Conrad, who a short time since made a sale of his Madisonian property, will arrive from the north today and after attending to some business which requires his attention here, will leave for

California.

Something like 120,000 shares of stock was sold at the delinquent sale of the Hercules Mining company on Thursday ast. Nearly all of it was bought in by the company and placed back into the reasury, to be sold again for development

reasury, to be sold again for development urposes.

Frank M. Taylor of the Taylor & Brunon sampling works, came in from Denver resterday morning and spent the day sizing up the new mill, which now only leeds the installation of the electric moors to be in condition for business. These nachines are expected to arrive daily. Superintendent Chambers is again giving his attention to matters at the Onarlo. He declines to state positively, but ays it is quite possible that the Ontarion mill will be started up again about the st of June. At the Marsac considerable rouble is being experienced through a hortage of water, and it is therefore hard o hold the plant up to its rankimum contage. The difficulty is hoped to be overforme at an early date.

GOODS ARE WELL SUPPLIED.

Sales of Wool in Two Weeks Have Been Only 7,332,700 Pounds-Copper Strong and a Shade Higher-On the Stock Exchange-Bank Clearings For Week.

New York, March 16 .- R. G. Dun &

quotation has advanced, but tank plates at Pittsburg are a shade lower at 2 cents. Eastern gray forge has sold there in considerable quantity at \$20,50 and \$21.00 for local forge and southern No. 1 foundry is selling here at \$22.75 against \$23.50 for northern No. 1. Bessemer pig is still held at \$24.00 at Valley mills, though small lots are obtainable at Pittsburg at \$24.50. Many large contracts are mentioned as in prospect, but none is closed except a structural contract for the government printing of-

fice.

Much work is deferred because of the builders and machinists' strike at Chicago and because of doubt whether prices can be held with the output exceeding consumption over 1,000 tons per day.

day,
Copper is strong and a shade higher, Copper is strong and a shade higher, but large arrivals have caused some decline in tin. It is not strange that higher prices have been asked for most cotton goods with the markets for raw cotton higher than they have been since Jan. 10, 1893, and the break in its price did not go far enough to change the situation. With print cloths at 3½ against 4.06 early in 1893, standard and southern sheetings ½@½ lower and ginghams 1 cent lower than in 1893, the mills would be asking more if they had not taken large supplies of cotton before the rise in February. The disposition to order goods ahead is much affected with much doubt about price and consumption would probably be affected if present prices were to continue. Sales of wool have been only 7,332,700

pounds in two weeks. Manufacturers have such supplies that they buy only to piece out for special wants, and the best dealers report that a yielding of 1 cent would be required in order to affect sales. Quotations are really nominal for health of the sales. fect sales. Quotations are really nom inal for lack of transactions. The mill inal for lack of transactions. The mills are still producing great quantities of goods without buying wool. Prices of leading goods have not declined, but others, both plain and fancy are somewhat weaker.

The yielding in satin leather has led to considerable sales of men's shoes at 2½ cents decline, but the concessions recently made in boots by makers who held old stocks of leather are now re-

recently made in boots by makers who held old stocks of leather are now refused, and it is claimed that transactions in hemlock and oak sole have been larger than at any time since November. Most of the makers are receiving very slender orders. The market for hides at Chicago is again weaker, though the decline is not large. Failures for the week have been 198 in the United States, against 189 last year, and 23 in Canada against 30 last year.

ON THE STOCK EXCHANGE.

Speculation May Not Be Benefited By New Currency Law.

New York, March 16.-Bradstre inancial review tomorrow will say: An event like the passage and formal en actment of the currency bill, accon panied, as it is, by the promise of considerable increase in the national bank circulation, is something which the stock market expected to celebrate by an exhibition of decided bullishness. But, although the action of congress on the measure was certain for some weeks past, there was no demonstration of this kind based on it, and this week the market has been dull professionally, and at times inclined to sag lower. The undertion is bullish, and there is a general feeling that speculation will be materially benefited by the oill.

When, however, the market on last

When, however, the market on last Saturday and Monday developed con-

When, however, the market on last Saturday and Monday developed considerable strength, accompanied by extensive covering by short interests, the movement was abruptly checked by the rise of the call loan rate to 6 per cent. Notice was thus served on the speculative community that it erred in disregarding the decrease of the bank reserves and the reduction of the surplus to slim proportions in Saturday's bank statement.

The showing in question merely supplemented the statements for a series of weeks past, all of them pointing to the fact that preparations for banks for taking out additional circulation under the new law have involved the purchase of a large amount of governments, a considerable part of which is being temporarily carried on loars at New York, thereby diminishing the extent of the accommodation the banks can, at the moment, extend to the stock market.

It would seem that this warning was market.
It would seem that this warning was

It would seem that this warning was not lost. For the balance of the week the market was very dull, with a disposition to sell on the certainty that tomorrow's bank statement will be bad, perhaps to the extent of wiping out the surplus reserve and substituting a deficit, although relief is promised from the treasury's payment of premiums on bonds deposited in exchange for new 2s, and from the interior banks funds to pay the government for bonds bought for circulation purposees.

ment for bonds bought for circulation purposes.

Activity was confined to spots and a few specialties, notably Third Avenue, engrossed the attention of the traders, while little attention was paid to the good railroad earnings, and the favorable reports concerning industrial properties. The duliness, however, had its benefits. The pressure on the money market was relieved, and call loans, while firm, were generally held at 5 per cent or less. Nor, while bear traders showed some activity, was there any

part, the prevalent feeling being that when money relaxes stock prices would really appreciate.

The public, however, was conspicuously inactive, and the leading bulls showed little disposition to do anything beyond protecting their specialties to a certain extent.

BUSINESS OF THE BANKS.

Clearings For the Week as Reported By Bradstreet's Agency.

New York, March 16.—The following table, compiled by Bradstreet, shows the bank clearings at all the principal cities of the United States and Canada for the week ended March 16, with the percentage of increase and decrease, as compared with the corresponding week last year: CITIES. | Amount, |Inc.|Dec.
